

CricketPlayerPerformanceTracking

Application : CRICKSTATS

UserStory:

As a Salesforce Admin, I want to create a comprehensive player performance tracking application within Salesforce to capture and analyze detailed match-by-match information of cricket players. This application will include custom objects such as Player and Match Performance with carefully defined fields and relationships to ensure data integrity and accessibility. By leveraging master-detail and lookup relationships, the application will enable robust tracking of individual and team performances, facilitate insightful reporting and analytics, and support the overall management of player statistics, thereby enhancing strategic decision-making and player development initiatives.

1. INTRODUCTION

Project Overview :

CRICKSTATS is a Salesforce-based application designed to track, manage, and analyze cricket players' performance on a match-by-match basis. The system uses custom objects, relationships, dashboards, and automation tools to provide structured performance insights.

It enables coaches, analysts, and administrators to record player statistics, generate reports, and support strategic decision-making.

Purpose:

The main purpose of this project is:

To digitize player performance records

To improve accuracy and accessibility of cricket statistics To

provide real-time analytics

To support player development and team planning To

automate data management using Salesforce

2. IDEATION PHASE

Problem Statement (Customer Problem Statement Template)

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A cricket team coach	Track player performance across matches	I cannot get accurate statistics easily	Data is stored in different files and formats	Frustrated and unsure about team selection
PS-2	A team manager	Maintain complete player records	It takes too much time to update and verify data	Most records are maintained manually	Stressed and inefficient
PS-3	A sports analyst	Analyze player trends and generate reports	I face difficulty in comparing performance s	There is no centralized analytics system	Confused and dissatisfied

Problem Statements

		
A cricket team coach	A team manager	A sports analyst
PS-1	PS-2	PS-3
 A cricket team coach	 A team manager	 A sports analyst
I am: Track player performance across matches	I am: Maintain complete player records	I am: Analyze player trends and generate reports
But: I cannot get accurate statistics easily	But: It takes too much time to update and verify data	But: I face difficulty in comparing performances
Because: Data is stored in different files and formats	Because: Most records are maintained manually	Because: There is no centralized analytics system
 Frustrated and unsure about team selection	 Frustrated and unsure about team selection	 Confused and dissatisfied.

Brainstorming

Brainstormed Ideas

- Web-based player management system
- Mobile statistic tracker
- Salesforce-integrated CRM
- AI-based performance prediction
- Dashboard-based analytics

Selected Idea: Salesforce-based performance tracking platform (CRICKSTATS)

3. REQUIREMENT ANALYSIS PHASE

Customer Journey Map

Journey Stages:

- Login
- EnterPlayerData
- RecordMatchPerformance
- GenerateReports
- AnalyzeResults
- DecisionMaking

SolutionRequirements

FunctionalRequirements

FRNo	Requirement
FR-1	PlayerRegistration
FR-2	MatchPerformanceEntry
FR-3	DashboardGeneration
FR-4	ReportCreation
FR-5	FlowAutomation

Non-Functional Requirements (NFRs) – CRICKSTATS

NFR-1: Usability

The system should be easy to understand and use by coaches, managers, analysts, and admins without requiring technical training.

Requirements

- Simple and intuitive user interface
- Clear navigation menus
- Easy-to-read dashboards
- Minimal learning curve

Examples:

- A new coach should be able to:
- Log in
- Enter match data
- View player reports
- within a few minutes without special training.

Example: The Salesforce Lightning interface provides drag-and-drop dashboards and user-friendly forms.

NFR-2: Security

The system must protect sensitive player data from unauthorized access.

Requirements

- Role-based access control
- Secure authentication
- Encrypted data storage
- Regular backups

.

Examples:

- Coaches can view player statistics
- Managers can edit records
- Analysts can generate reports
- Only admins can modify system settings

Example: Salesforce Profiles and Permission Sets restrict access to confidential information.

NFR-3: Reliability

The system should function correctly without failure and store data accurately.

Requirements

- No data loss
- Automatic backups
- Error handling
- System stability

Example:

If a manager enters match statistics and loses internet connection, the data should be saved automatically when reconnected.

Salesforce cloud backup ensures recovery in case of system failure.

NFR-4: Performance

The system should respond quickly and handle large volumes of data efficiently.

Requirements

- Fast page loading
- Quick report generation
- Smooth dashboard rendering
- Minimal response time

Example:

When an analyst generates a performance report for 100+ players, the report should load within 2–3 seconds.

Optimized Salesforce queries and caching improve response speed.

NFR-5: Availability

The system should be accessible whenever users need it.

Requirements

- 24/7 system availability
- Minimal downtime
- Cloud-based access
- Disaster recovery

Example:

Coaches should be able to access CRICKSTATS even during tournaments at night or on weekends.

Salesforce provides high uptime with cloud hosting.

NFR-6: Scalability

The system should support increasing numbers of users, players, and records.

Requirements

- Handle growing datasets
- Support more teams and leagues
- Expand storage capacity
- Maintain performance under load

Example:

If CRICKSTATS is extended from one team to 50 teams, the system should still perform smoothly.

Salesforce cloud infrastructure automatically scales storage and processing.

4. PROJECTDESIGNPHASE

Problem–SolutionFit

The CRICKSTATS system effectively addresses the key challenges faced in traditional cricket performance management. Earlier, most player and match data were maintained using manual records, which were time-consuming and prone to errors. This issue has been resolved by implementing an automated system through Salesforce, which ensures accurate and efficient data entry and management. The problem of data loss, caused by improper storage and lack of backups, is overcome by using secure cloud storage that safely stores all information and allows easy retrieval. Poor analysis of player performance, due to scattered and unorganized data, is addressed through interactive dashboards that present clear visual insights and reports. Additionally, delays in accessing performance information and generating reports are eliminated by providing real-time reporting features, enabling users to make faster and more informed decisions. Thus, CRICKSTATS successfully bridges the gap between existing problems and modern technological solutions.

Problem-Solution Fit

Proposed Solution

Description

CRICKSTATS provides:

- Custom objects (Player, Match Performance)
- Master-detail relationships
- Roll-up summaries
- Lightning App
- Automated flows
- Interactive dashboards

Key Features

- Centralized database
- Live statistics
- Secure access

- Scalabledesign
- Easyreporting

SolutionArchitecture

ArchitectureLayers

- PresentationLayer(LightningUI)
- ApplicationLayer(Flows,Logic)
- DataLayer(Objects)
- AnalyticsLayer(Reports)

5. PROJECT PLANNING & SCHEDULING

Project Planning

- Agile-based execution
- Object creation → automation → reporting
- Sprint-wise development

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story/Task	Story Points	Priority	Team Members
Sprint-1	Developer Setup	USN-1	As an admin, I want to create a Salesforce developer account so that I can configure and deploy the CRICKSTATS system.	1	High	B.Dhivya
Sprint-1	Data Modeling	USN-2	As an admin, I want to create Player and Match Performance objects so that player and match data can be stored systematically.	3	High	K.Keerthiga
Sprint-2	Navigation	USN-3	As a user, I want separate tabs for each object so that I can easily navigate and manage records within the application.	3	High	B.V.Harini
Sprint-2	UI Design	USN-4	As a coach, I want a dedicated Lightning App so that all performance tracking features are accessible from one dashboard.	3	High	K.Lavanya
Sprint-2	Data Structure	USN-5	As an admin, I want to create player and match fields so that complete performance details can be captured accurately.	5	Medium	P.Kaaviya
Sprint-2	Data Structure	USN-6	As a user, I want customized page layouts so that only relevant fields are displayed during data entry.	5	High	K.Keerthiga
Sprint-2	Automation	USN-7	As a system, I want to validate player and match input so that incorrect data entries are prevented.	3	High	K.Lavanya
Sprint-3	Automation	USN-8	As a system, I want automated flows to update player statistics so that performance data remains accurate.	5	High	B.Dhivya

ProjectTracker,Velocity&BurndownChart:(4Marks)

Sprint	TotalStory Points	Duration	SprintStart Date	SprintEndDate (Planned)	StoryPoints Completed (as on PlannedEnd Date)	SprintRelease Date (Actual)
Sprint-1	20	6Days	24Oct2022	29Oct2022	20	29Oct2022
Sprint-2	20	6Days	31Oct2022	05Nov2022		
Sprint-3	20	6Days	07Nov2022	12Nov2022		
Sprint-4	20	6Days	14Nov2022	19Nov2022		

6. ProjectDevelopmentPhase:

ProjectFlow

Milestone1:Creationofdeveloperaccount

Milestone 2 : Object Creation

Milestone3 : Tabs

Milestone 4 : The Lightning App

Milestone5:Fields&Relationships

Milestone 6 : Roll-up Summary

Milestone 7 : Flows

Implementation

Milestone1-Salesforcedeveloperaccountcreation:

Activity1:CreatingDeveloperAccount:

Creating a developer org in salesforce.

1. Go to <https://developer.salesforce.com/signup>
2. On the sign up form, enter the following details :

Build enterprise-quality apps fast to bring your ideas to life

- Build apps fast with drag and drop tools
- Customize your data model with clicks
- Go further with Apex code
- Integrate with anything using powerful APIs
- Stay protected with enterprise-grade security
- Customize UI with clicks or any leading-edge web framework

Sign up for your Salesforce Developer Edition
A full-featured copy of the Platform, for free

Complete the form to start your free trial. Our team will be in touch to help you make the most of your trial.

First Name*
Your first name

Last Name*
Your last name

Email*
Your email address

Role*
Your job role

Company*
Company Name

- 1) First name & Last name
- 2) Email
- 3) Role : Developer
- 4) Company : College or Company Name
- 5) Country : India
- 6) Postal Code : pin code
- 7) Username : should be a combination of your name and company

This need not be an actual email id, you can give anything in that format:

username@organization.com

Click on sign me up after filling these.

Activity2:AccountActivation:

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.
2. Click on Verify Account.

3. Give a password and answer a security question and click on change password.

This screenshot shows the "Change Your Password" form in Salesforce. The title "Change Your Password" is at the top. Below it, the text says "Enter a new password for lead@sb.com. Make sure to include at least:". There are three green checkmarks indicating requirements: "8 characters", "1 letter", and "1 number". The form has several fields: "New Password" (with a "Good" status), "Confirm New Password" (with a "Match" status), "Security Question" (a dropdown menu showing "In what city were you born?"), and "Answer" (with the text "asdfghjkl" entered). A blue button labeled "Change Password" is at the bottom. A red rectangle highlights the "New Password", "Confirm New Password", "Security Question", "Answer", and "Change Password" fields.

4. Then you will redirect to your salesforce setup page.

Milestone2-

ObjectCreationActivity 1 :

Player Object

1. In yourSalesforceorg,clickgearicononthetopleftandselectSetuptoopen Setup.

2. ClicktheObjectManagertab.Ifyoudon'tseeit,enterObjectManagerinthe Quick Find box.

3. On the Object Manager page, click Create | Custom Object.

1. Fromthesetuppage→ClickonObjectManager→ClickonCreate→Clickon Custom Object.
 - **Label** : Player
 - **Plural Label** : Players
 - EnterRecordNameLabelandFormat
Record Name : Player Name
Data Type : Text
 - **In Optional features** : check the boxes for Allow Reports | Allow Activities |TrackFieldHistory.
 - **Search Status** : check the box for Allow Search.
 - Save

Activity2:MatchPerformanceObject

1. Fromthesetuppage→ClickonObjectManager→ClickonCreate→Clickon Custom Object.
 - **Label** : Match Performance
 - **Plural Label** : Match Performances
 - Enter Record Name Label and Format
RecordName:CustomerAccountName
Data Type : Text
 - **In Optional features** : check the boxes for Allow Reports | Allow Activities |TrackFieldHistory.
 - **Search Status** : check the box for Allow Search.
 - Save.

Milestone3-Tabs

Activity1:Customtabcreation

1. Gotosetuppage→typeTabsinQuickFindbar→clickontabs→New (under custom object tab)
2. SelectObject(Player)→Selectthetabstyle→Next(Addtoprofiles page) keep it as default → Next (Add to Custom App)uncheck the include tab .
3. MakesurethattheAppendtabtousers'existingpersonalcustomizations is checked.
4. Click save.
5. Repeat the same steps for Match Performances.

Milestone 4 - The Lightning

AppActivity1:Createalightingapp

1. Go to setup page → search “app manager” in quick find → select “app manager” → click on New lightning App.

2. Fill the app name in app details and branding as follows:
 - App Name : CRICKSTATS
 - Developer Name : Auto Populates
 - Add image optional (if you want to give any image you can, otherwise not mandatory) -
 - Add Primary color Hex or leave it to default.
 - Then click Next.
3. In App options
 - Navigation style: Standard navigation Setup
 - experience : setup
 - Supporters form factors: Desktop and phone
 - Then click Next
4. In Utility items
 - Utility Bar alignment: Default
 - Then click Next.
5. Navigation items
 - Select the created Custom Objects and required standard objects
 - Players
 - Match Performances
 - Reports
 - Dashboards

Navigation Items

Choose the items to include in the app, and arrange the order in which they appear. Users can personalize the navigation to add or move items, but users can't remove or rename navigation items. These items are dropped from the navigation bar when the app is viewed in a format that the item doesn't support.

The screenshot shows the 'Navigation Items' configuration interface. It consists of two main panels: 'Available Items' on the left and 'Selected Items' on the right. The 'Available Items' panel has a search bar with the text 'Dash' and a list of items below it, with 'Dashboards' highlighted by a red box. The 'Selected Items' panel has a list of items: 'Players', 'Match Performances', and 'Reports', all of which are highlighted by a red box. Between the two panels are navigation arrows: a right-pointing arrow (highlighted with a red box) and a left-pointing arrow. At the bottom of the interface are 'Cancel' and 'Save' buttons, with the 'Save' button highlighted by a red box.

6. ToAddUserProfiles:SystemAdministrator

The screenshot shows the 'New Lightning App' configuration interface, specifically the 'User Profiles' section. The title 'New Lightning App' is at the top. Below it, the section is titled 'User Profiles' with the instruction 'Choose the user profiles that can access this app.' There are two panels: 'Available Profiles' on the left and 'Selected Profiles' on the right. The 'Available Profiles' panel has a search bar with the text 'System administrator' (highlighted with a red box) and a list of items below it. The 'Selected Profiles' panel has a list of items: 'System Administrator' (highlighted with a red box). Between the two panels are navigation arrows: a right-pointing arrow (highlighted with a red box) and a left-pointing arrow. At the bottom of the interface is a progress bar with four steps, the last of which is active. To the right of the progress bar is a 'Save & Finish' button (highlighted with a red box) with a red arrow pointing to it.

7. Click Save &Finish.

Milestone5:Fields&Relationships

Activity1:CreateCustomfieldsforPlayerobject

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.
2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.
3. From the object manager page, in the Quick Find box, search for the custom object you just created : **Player**
4. From the sidebar, click Fields & Relationships. Notice that there are already some fields there. Those are the standard fields.
5. Click New to create a custom field. Tip: Before creating a new field, do a quick search to make sure a similar one doesn't already exist.
6. Next, choose a data type as Text. Choosing a data type helps you format the field input.

7. Click on next.

8. **DataType:Text**

Field Label: Player Name

FieldName:AutoPopulates

Activity2:FlowonHomePage

1. On your CRICKSTATS Application on the top right of the Navigation Bar click on **Personalize your navbar icon (Pencil icon)** and Add Home Page and click Save.

2. Remove all other components and Add **FLOW** component from the standard components on the left side.
3. **Flow: Players Flow**

4. Click **Save** and **Activation**.
5. Click on **App Default** and select **Assign to Apps**.

6. Select **CRICKSTATS** App and Click **Next** and then click **Save**.

Select Apps

Selected Lightning apps display "Home Page Default" as the home page.

Lightning Apps (12)		1 Selected
App Name	Description	
☐ Commerce	Manage your store's products, catalogs, and pricebooks.	
☒ CRICKSTATS	An application to collect, manage, and analyze cricket players' perfor...	
☐ Data Manager	Use Data Manager to view limits, monitor usage, and manage recipes.	
☐ LightningBolt	Discover and manage business solutions designed for your industry.	
☐ LightningInstrumentation	View Adoption and Usage Metrics for Lightning Experience	
☐ Queue Management	Create and manage queues for your business.

7. FUNCTIONAL & PERFORMANCE TESTING

During the testing phase, screenshots were captured from the Salesforce Lightning user interface to verify the correct functioning of all implemented features in the CRICKSTATS system. These include record creation for Player and Match Performance objects; validation rule checks for mandatory fields, score limits, and input constraints; verification of record type behavior for Domestic and International match categories; and flow execution for automatic updating of player statistics and data consistency. The functionality of roll-up summary fields was also tested to ensure accurate calculation of total runs, wickets, averages, and performance metrics.

In addition, system performance was evaluated by monitoring response time during data entry, report generation, and dashboard loading. The application was tested under multiple user interactions to ensure stable performance without delays. Screenshots of generated reports and interactive dashboards were documented to confirm accurate data visualization, real-time updates, and reliable performance tracking. These testing

activities ensured that the CRICKSTATS platform met both functional and performance requirements and was ready for deployment.

1. SelectoneTeamfromthePicklistandClickNext.

The screenshot shows the 'players flow' page in the CRICKSTATS application. At the top, there is a navigation bar with the CRICKSTATS logo, a search bar, and several icons. Below the navigation bar, the 'players flow' section is active. It features a dropdown menu labeled '* Team' with a list of Indian cricket teams. The 'Royal Challengers Bangalore (RCB)' team is currently selected and highlighted in blue.

* Team
--None--
Chennai Super Kings (CSK)
Delhi Capitals (DC)
Kolkata Knight Riders (KKR)
Mumbai Indians (MI)
Punjab Kings (PBKS)
Rajasthan Royals (RR)
Royal Challengers Bangalore (RCB)
Sunrisers Hyderabad (SRH)
Gujarat Titans (GT)
Lucknow Super Giants (LSG)

The screenshot shows the 'players flow' page with a table displaying 1 item. The table has columns for Profile Picture, Player Name, Total Runs, AVG Score, Nationality, Batting Style, Bowling Style, Matches Played, Number of 50's, and Number of 100's. The data row shows Virat Kohli with 746 total runs, an average score of 49.73, and 15 matches played.

Profile Picture	Player Name	Total Runs	AVG Score	Nationality	Batting Style	Bowling Style	Matches Played	Number of 50's	Number of 100's
	Virat Kohli	746	49.73	India	Right-Handed	Right-Arm Medium	15	5	1

The screenshot shows the 'players flow' page with a table displaying 2 items. The table has columns for Profile Picture, Player Name, Total Runs, AVG Score, Nationality, Batting Style, Bowling Style, Matches Played, Number of 50's, and Number of 100's. The data rows show Shreyas Iyer and Rahmanullah Gurbaz.

Profile Picture	Player Name	Total Runs	AVG Score	Nationality	Batting Style	Bowling Style	Matches Played	Number of 50's	Number of 100's
	Shreyas Iyer	58	58	India	Right-Handed	Right-Arm Spin	1	1	0
	Rahmanullah Gurbaz	62	31	Afghanistan	Right-Handed	Right-Arm Medium	2	0	0

8. ADVANTAGES& DISADVANTAGES

Advantages

- Centralizedsystem
- Real-timeanalytics
- Secureplatform
- Scalabledesign
- Reducedmanualwork

Disadvantages

- RequiresSalesforcelicense
- Internetdependency
- Limitedofflineaccess

9. Conclusion:

CRICKSTATS successfully implements a cloud-based cricket performance tracking system using Salesforce. The system automates data management, improves reporting accuracy, and supports informed decision-making.

TheprojectdemonstratespracticalapplicationofSDLC,Agilemethodology,and CRM-based development.
